(54) Title: IMPROVED rAAV VECTORS

(57) Abstract: Disclosed are methods for use of therapeutic polypeptide-encoding polynucleotides in the creation of transformed host cells and transgenic animals. In particular, the use of recombinant adeno-associated viral (rAAV) vector compositions that specifically target mammalian cells, such as pancreatic islets cells, that express low-density lipoprotein receptors on their cell surface. The disclosed vectors comprise one or more polynucleotide sequences that express one or more mammalian polypeptides having therapeutic efficacy in the amelioration, treatment and/or prevention of AAT-or cytokine polypeptide deficiencies, such as for example in diabetes and related diseases, as well as a variety of autoimmune disorders including, for example, lupus and rheumatoid arthritis.

Form PCT/ISA/210 (second sheet) (July 1998)

International application No.

PCT/US03/12225

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)				
This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1.		Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:		
2.	\boxtimes	Claim Nos.: 4-7 and 11-13 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: The claims read on SEQ ID NOs but are unsearchable because a computer readable from of the Sequence Listing was not supplied.		
3.	6.4(a).	Claim Nos.: 35-43 because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule		
Box	п Ор	servations where unity of invention is lacking (Continuation of Item 2 of first sheet)		
This	Internat	ional Searching Authority found multiple inventions in this international application, as follows:		
 2. 3. 		As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:		
4. Rem	nark on	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.
